Design & sustainability

Our journey in the circular transition has begun. We want to become part of a world in balance and develop products with eco-respect, responsible supply chains and circular life.

From idea to reuse, in decision and action, this is where we create new conditions and opportunities for sustainable development and circularity.

This means respecting ecological limits, natural resources and climate change. Supporting responsible suppliers and investing in sustainable competition on equal terms, where prices are not cut at the expense of people nor the environment. As well as giving products a circular life and creating space for circular flows, from the idea to reuse for a sustainable future.

Join us in creating the next generation of storage and recycling.

Design and method

We look at design from a broader perspective which always includes aesthetics as well as sustainability and function. A key factor for progress is curiosity and being open to new solutions such as switching to fossil-free alternatives, choosing recycled materials and designing for the future and a circular economy.

How we work

Committed to reducing our carbon footprint in everything we do, we've developed a product assessment system. For us it serves as a tool to work with, for our customers it helps them choose products. We want to make it easy for our customers to make sustainable choices – together we can achieve a sustainable future.

Read more on page 145.

Cooperation is key

We think it is important with our customers' opinions because they give us valuable insights into which products we need to develop to meet market demand. When we start a project, we are therefore careful to investigate what needs exist and develop a plan for how we can solve them together. By working closely together, we can ensure that our customers' thoughts and ideas are with us from the first call to the completed project.

We are experts in storage

We are happy to share our knowledge with our customers, whether it is about flexibility and function in the modern office or smart solutions for the activity-based offices of the future. With our experience and knowledge, we create an optimal solution.

Feel free to contact us for a presentation, to find out more about how we can together create a working solution.

Our designers

At TreCe, we have designed several of our products ourselves. These have in most cases taken shape based on needs we have seen in the market but also from the input that our customers give us. We have also chosen to collaborate with other designers. This has in several cases proved to be a stroke of luck. With new input, innovative solutions and a fantastic design, we have won international awards. Cooperation is the key.

Our designers

Jangir Maddadi

Jangir is passionate about creating objects with a strong identity. Every millimetre of his design is contemplated. Each object has its own history. Every product he creates is a beautiful, functional sculpture. He strives to design meaningful products that live on from generation to generation.

One ambition is to always create innovative and sustainable products that are functional, beautiful and completely independent of trends. Products that are neither modern nor classic, they are timeless.

Annica Doms

Educated at Luleå University of Technology. Annica's Master degree project, Kite Bin for TreCe, has been awarded the Red Dot Design Award and the German Design Award. Today, Annica is a design consultant at Studio Doms.

The collaboration with TreCe is based on relevant and well-thought-out design that supports every function, inspired by functional design from the past.

David Doms

Designer and founder of Studio Doms. David has a master's degree in industrial design from Luleå University of Technology and has also studied lighting and luminaire design.

Studio Doms was started in 2010 and the company is today active in the areas of furniture design, product design, design strategy and graphic design.

Ebba Hellberg & Sigrid Ljungström

A contributing factor to TreCe's continuous development of innovative design solutions is our recurring collaborations with design students. Recycling unit Cloud is a well-priced example, developed together with Chalmers students Ebba Hellberg and Sigrid Ljungström.

Cloud has quickly developed into a product family and recently won first prize in the German Design Award 2019, Excellent Product Design in the category office furniture / environmental sorting.

Hightower & Popsicle

 Design | **Jangir Maddadi**

NEW

Popsicle and Hightower are a new series of waste bins designed by Jangir Maddadi. They are the only products we can offer for outdoor use – or indoors if you prefer. The frame is made of galvanised steel sheet that can be lacquered in our standard colours or any RAL colour. Popsicle holds 57L, adapted for waste bags 85-125L and Hightower holds 125L, adapted for waste bags 85-140L.

There are 3 different versions of leg stands for Popsicle, depending on how and where you want to place it. Legs for Hightower are available in 3 different versions, oak legs, stainless steel legs where both have adjustable feet and then a concrete base with 4 stainless steel legs. The wooden legs are only suitable for indoor use but the other options work well outdoors. Naturally it is stainless steel for outdoor use and Swedish steel plate for indoor use, there are also different options for anchoring Popsicle to the foundation.

Butler

Design | **Jangir Maddadi**

When Jangir designed our new product, Butler, it was not primarily intended as just a waste bin. It would create both identity and a sense of good design where it was placed. A waste bin you do not want to hide, as it both strengthens and beautifies the environment with its peculiar shape. The bin can be placed alone or in a group.

Butler consists of an outer shell in fibreglass with a simple frame of Swedish steel. The shell, which is very shock-resistant, is easy to lift off when changing the waste bag. Butler is ideal for offices, shopping malls, hotels, schools, universities and other public spaces. Butler is made in two sizes, Small 46L and Large 116L.

Kite mini

Design | **Annica Doms**

Kite, has retrieved both its name and its appearance from the geometric shape of a kite. The straight angles give a bold and exciting expression, and at the same time harmonise with the room and its shape. The unique form holds angles of 60 °, 90 ° and 120 ° which makes it ideal to place in corners with varying angles. Kite mini has the same shape and is an exact copy of Kite, but in a reduced size. This gives a clear "family feeling" and a uniform expression.

Kite mini is intended for smaller spaces like under desks, hotel rooms or smaller conference rooms. There is also a wall mount for Kite mini, which means that it can be placed on the wall. As single or in pairs to free floor space.

Kite mini is available in 11 RAL colours. Lids in colour white, anthracite or olive grey with 6 different screen printed symbols for recycling. Kite mini holds 10 litres.

Hold

Design | **Tengbom**

TreCe, together with Tengbom architects, have developed the recycling bin Hold. A collaboration that started with Tengbom seeing a need for a different and functional recycling bin that could meet the needs of smaller spaces. Conference rooms, hotel rooms, smaller meeting rooms, etc. TreCe was contacted and the result was Hold.

A small and functional bin with a lid that is available in 7 different profiles. There is also a wall mount for Hold, which means that it can be placed on the wall.

Hold is available in 11 RAL colours. 7 different lids with different profiles and text for easy sorting. Adapted bag holder and containers in recycled plastic, available as an accessory. Hold holds 20 litres.

Wine red RAL 3005

Hold mini

Design | **Tengbom**

Hold mini waste bin is a little brother to Hold. TreCe has together with Tengbom architects developed the recycling unit Hold. As part of this collaboration, Hold mini has seen the light of day. Hold mini is half the size of its big brother Hold. With only one fraction for sorting, Hold aims to function as a pure wastebasket in conference rooms, hotel rooms, smaller meeting rooms etc. A small and functional bin with one type of inlet and a small container. Hold mini also has a wall bracket, which means that it can be placed on a wall.

Sustainability and materials

Frame in powder coated steel made in Sweden, consists of 20% recycled materials. The steel is 100% recyclable. The powder coating is a good environmental choice as no solvents are used. Inner container in 100% recycled plastic. The inner container is dishwasher safe.

Old pink RAL 3014 Saffron RAL 1017

Warm grey NCS / RAL 7032 Anthracite NCS / RAL 7016

Ridge

 Design | **Studio Doms**

Ridge, with its special expression, becomes a different and expressive feature in the modern office. It gives the impression of an interior detail, not just an recycling station. Standing together Ridge creates a feeling of a city skyline. Details such as bevelled outer edges and a slight distance between the frame and top shows a feel of quality and detail.

A very stable construction that is built of 22 mm MDF and lacquered in 11 standard colours. The stainless steel ramp for easy access of a 140 litres waste bin is not only a practical detail, but also a part of the design that stands out. Ridge is also available in two heights, low and high. What distinguishes low and high is the slope of the upper frame.

Both versions are easily emptied with the door's aximate hinges, 135° opening. Ridge can be ordered with different recycling symbols depending on the purpose and waste.

Clean Dispenser stand

Design | TreCe

Clean is a flexible hand sanitiser dispenser stand. Having good hand hygiene is important to protect both yourself and others from reducing the spread of infection and virus. When TreCe realised that the spread of infection became a problem in society, we began to think about how we could contribute, and came up with our own solution.

A hand sanitiser floor stand, which is based on the customer's needs. Flexibility and simplicity are important to many and we have chosen to focus on that. The foundation is a stand with a stable base, with accessories you need and believe are of importance to yours customers. Two different models of bottle holders (750 ml and 1000 ml) with leaking tray, holders for Tork M1 dispenser, a small bin and a sign for your own message (horizontal A4). The stand consists of perforated holes on the front and back, where you simply hook on the accessories you have chosen in the place you want. In a preschool, you may choose to place the accessories at a lower height than in a high school, for example. Clean is made of Swedish quality steel and powder coated in Anthracite grey colour RAL 7016.

Space Storage

Space storage and modules provide space for personal and public storage. Flexible modules designed for personal storage in offices and in public environments. Space is easy to fit in thanks to its uniform and well-thought-out design. The well-crafted details such as doors in a comprehensive design create a seamless and stylish feeling. This is also reflected in the fact that Space is a sustainable choice as it is approved according to Möbelfakta, consists of sustainable materials, manufactured with social responsibility and quality tested at RISE.

The modules in the Space series are created to fit together, so you can let your imagination flow freely when you build your unique solution. Choose between three heights on the frame and four different heights on doors. Frames in standard white or lacquered in any NCS colour. Doors in lacquered MDF, optional NCS colour, which has a comprehensive design. There are also twelve ready-made modules to choose from. Discover the entire series within Space, which consists of storage cabinets, storage lockers, benches, seating modules, shoe shelves, drawers, wardrobes and modules with recessed electricity.

Locks and closing

We offer different types of locks and closings for doors, such as electronic RFID locks, code locks, cabinet locks, padlock fittings and push-to-open. For network-based locks, contact TreCe for individual advice.

Accessories

For Space storage lockers/units there are accessories such as removable shelves, clothes rail, mirror, hook, carpet, cork box Stuff and Office products. Integrated electricity for charging computers/mobile phones is also available as an option.

Customisation

If you want to put your own touch on furniture, Space can be customised in both materials and dimensions. Contact TreCe for advice and a quote.

New in the Space family

Internal dimensions/locker, Space door middle: W363xH573xD454 mm.

Space 13
Space frame single high/3 with fixed shelves and Space door middle.

Space 14
Space frame double high/3 with fixed shelves and Space door middle.

Space personal storage has been expanded by an additional door height, which we have chosen to name “middle”. This door size only fits Space frame high/3, which like the other units is available in a single and double version. Space door middle is available with several different lock types and can be fitted with a letterbox. Internal dimensions/locker: Space door middle: W363xH573xD454 mm.

Space is now also available as a storage series with working height counters, in height 882 mm. Frames in single and double modules that can be freely combined with shelves, doors, partition panels and drawers in several variants.

The Space storage series also has its own recycling units. Choose freely from one of the ready-made modules or put together your own version. Suitable bag holder is available as an accessory. Inlets are also available in the top cover at an additional cost. Ready-made modules with a front inlet have a pull-out bag holder inside the door, recommended waste bags 85-125 L. The fronts are seamless with push open fittings.

Dimensions: Width x Height x Depth (height incl. plinth). **Frame:** 19 mm. **Plinth:** 157 mm.

Mounting strip is included in all wall mounted products.

NCS refers to product lacquered in one optional NCS colour.

DOWNLOAD

CombiLine

Combi shelf

The Combi shelf, an adaptable storage unit. Build freely from floor to ceiling. Utilise the wall surface with a wall mounted combi shelf and create a unique module by freely combining together with optional accessories. The Combi shelf is available in standard white or lacquered in any NCS colour. Worktops for the lower models are also available as a supplement. Accessories such as legs, wheels and doors can be found on pages 140–142. Work tops for the lower modules can be found on page 138.

Add a worktop to low modules for a more integrated look.

Mail

Post storage

Space efficient mail unit for the new era of mail sorting. Mail is available in standard white with plinth and worktop in high pressure laminate, ash or anthracite. Mail holds space for hanging folders in folio format, mail-inlet for outgoing mail, a waste unit and a drawer for office items.

Specially designed symbols and a 60-litres container are included. Contact TreCe if you wish to combine your own module.

Storage suitable for envelopes, etc.

Drawer adapted to the Mail's plastic tray.

Drawers for hanging folders in folio format, 365x240 mm, c/c 390 mm. Folders are available as accessories.

Door with inlet, 60-litres container included.

Soft

Media unit

Storage unit in white pigmented ash veneer or white lacquered MDF. Both models have the same high quality on all sides and comes with robust legs in white pigmented solid ash. Made of carefully selected materials with low environmental impact where all the wood is traceable.

Available in versions of two, three and four storage units. All units are prepared for media storage, with outlets for cables and ventilation. Soft is also available as a wall module.

Soft has a small hidden drawer in the drawer for a plain outside and a functional inside. Distance between door and frame for ventilation.

Hightower and Popsicle Recycling

Popsicle and Hightower are part of a new range of waste bins designed by Jangir Maddadi. The frame is made of galvanised sheet steel that can be lacquered in our standard colours or any RAL colour. Popsicle holds 57L, adapted for waste bags 85-125L and Hightower holds 125L and is adapted for 85-140L waste bags.

There are 3 different versions of leg stands for Popsicle, depending on how and where you want to place it. Legs for Hightower are available in 3 different versions, oak legs, stainless steel legs where both have adjustable feet and then a concrete base with 4 stainless steel legs. The wooden legs are only suitable for indoor use but the other options work well outdoors. Naturally it is stainless steel for outdoor use and Swedish

steel plate for indoor use, there are also different options for anchoring Popsicle to the foundation.

There are inlets on both the front and back. If placed outdoors, we recommend Popsicle/Hightower with a lid for bird protection.

Sustainability and materials

The frame in powder-coated steel sheet is manufactured in Sweden and consists of 20% recycled material. The steel sheet is 100% recyclable. The powder coating of the frame is a good environmental choice as no solvents are required.

Butler

Recycling unit

When Jangir designed our new product, Butler, it was not primarily intended as just a waste bin. It would create both identity and a sense of good design where it was placed. A waste bin you do not want to hide, as it both strengthens and beautifies the environment with its peculiar shape. The bin can be placed alone or in a group.

Butler consists of an outer shell in fibreglass with a simple frame of Swedish steel. The shell, which is very shock-resistant, is easy to lift off when changing the waste bag. Butler is ideal for offices, shopping malls, hotels, schools, universities and other public spaces. Butler is made in two sizes, Small 46L and Large 116L.

Black inner frame in RAL 9005.

Butler Small, white

Birdie

Recycling

Flexible recycling piece made of resistant Swedish steel. Available in 11 standard colours and delivered with specially designed symbols for easy sorting. Birdie is made in two sizes and holds 43 L (Birdie 500) and 63 L (Birdie 750). Both have soft closing lids and inlets in stable quality plastic. Birdie is available as floor standing and wall mounted, with matching wall brackets.

Birdie has received many international awards thanks to its unique shape and good design.

Sustainability and materials

Frame in powder coated steel made in Sweden, consists of 20% recycled materials. The steel is 100% recyclable. The powder coating is a good environmental choice as no solvents are used. The lid inlet is in plastic and marked according to ISO 11469 for recycling. It can easily be removed for cleaning and is dishwasher safe. The lid in the closed position prevents odor and works in an upright position as a splash protection. Birdie's thought through design makes it easy to empty.

Lid inlet in plastic.

Wine red RAL 3005 Old pink RAL 3014 Pearl white RAL 1013

Wall mounted Birdie. Anthracite RAL 7016

Cloud

Recycling

Cloud is a mobile recycling unit designed to fit into a modern work environment where flexibility and aesthetics are two key factors. With inlets from both sides, Cloud can be placed against a wall or in the middle of a room. Cloud is available in laminate and lacquered MDF. Doors and backs in powder-coated steel. Cloud is equipped with doors for easy emptying. Doors and backs are equipped with specially designed recycling symbols, and with the possibility to choose colour and labelling, Cloud can be adapted to different types of environments and needs.

White pull-out bag holders are included in the frame. Load capacity per wheel: 80 kg. Black wheels with rubber surface, height: 100 mm. Two of the wheels have a brake. Inlet from two directions,

front (door) and rear (back). Fitted lip on the inside of doors lead waste into the bag. Back is fixed. Designed for 85–125 litres bags.

Sustainability & Material

The frame in MDF comes from a traceable forestry, meets the requirements for E1 formaldehyde and CARB2. The frame is painted with water-based lacquer. Doors in powder-coated sheet steel are manufactured in Sweden and consist of 20 percent recycled material. The steel plate is 100 percent recyclable. Powder coating is a good environmental choice as no solvents are required.

Tested in accordance with SS-EN 16121:2013 and A1:2018.

Size: Width x Height (incl. wheels) x Depth.

This is how you order your Cloud:

1. Choose the frame (laminate or lacquered MDF).
2. Choose doors (backs are included)
Cloud 2 – 1. left & 1. right door
Cloud 3 – 1. left, 1. middle & 1. right door.
3. Choose 2. alt. 3. symbols depending on frame (same symbol selected for the door is also mounted on the opposite side (back)).
4. Add a rubber mat and moisture protection bottom if necessary.

Suitable waste bags: 85-125L

Kite

Recycling

A modulated recycling unit designed by Annica Doms. Awarded the Red Dot Design Award for its innovative form. Designed for modularity in different configurations. Kite can be placed against the wall or as a free-standing accent in the room. The many possible combinations challenges the imagination and inspires creativity. Lids with eight different designs with varying shapes and screen printed symbols for different types of waste. Kite is available in 11 RAL colours and Kite Raw with lids in three standard colours, white, anthracite and olive grey. Kite holds 70 litres, designed for standard bag of 85–125 litres.

Sustainability & Material

The lid's MDF meets E1 requirements for formaldehyde. MDF from certified forestry. The frame in powder-coated steel plate is manufactured in Sweden and consists of 20% of recycled material. The steel is 100% recyclable. The powder coating of the frame is a good environmental choice as no solvents are required.

Kite mini

Recycling

Kite mini is an exact copy of Kite, but in a reduced size. This gives a clear "family feeling" and a uniform expression. Kite mini is intended for smaller spaces like under desks, hotel rooms or smaller conference rooms. There is also a wall mount for Kite mini, which means that it can be placed on the wall. As single or in pairs to free floor space. Kite mini is available in 11 RAL colours. Lids in colour white, anthracite or olive grey with 6 different screen printed symbols for recycling. Kite mini holds 10 litres.

Sustainability & Material

The lid's MDF meets E1 requirements for formaldehyde. MDF from certified forestry. The frame in powder-coated steel plate is manufactured in Sweden and consists of 20% of recycled material. The steel is 100% recyclable. The powder coating of the frame is a good environmental choice as no solvents are required. Base in 100% recycled ABS plastic, marked for recycling according to ISO 11469. In line with our environmental strategy, Kite mini is delivered unassembled.

Hold

Recycling

TreCe, together with Tengbom architects, have developed the recycling bin Hold. A collaboration that started with Tengbom seeing a need for a different and functional recycling bin that could meet the needs of smaller spaces. Conference rooms, hotel rooms, smaller meeting rooms, etc. TreCe was contacted and the result was Hold.

A small and functional bin available in 11 RAL colours. 7 different lids with different profiles and text for easy sorting. Adapted bag holder and containers in recycled plastic, available as an accessory. Hold holds 20 litres.

Sustainability & Material

Frame in powder coated steel plate made in Sweden and consists of 20% recycled materials, The steel plate is 100% recyclable. The powder coating is a good environmental choice as no solvents are used. Container bin in 100% recycled plastic. The container bins are dishwasher safe.

Wall mount included for Hold Wall.

How to order Hold:

1. Choose frame (floor or wall) & colour.
2. Choose lid & colour.
3. Choose container bin or a bag holder.

Hold mini

Recycling unit

Waste bin Hold mini – a baby brother to Hold

TreCe has together with Tengbom architects developed the recycling unit Hold. As part of this collaboration, Hold mini has seen the light of day.

Hold mini is reduced to a third of its big brother Hold. With only one fraction for sorting, Hold aims to function as a pure waste bin in conference rooms, hotel rooms, smaller meeting rooms etc. A small and functional bin with one type of inlet and a small container.

Hold mini also has a wall bracket, which means that it can be placed on a wall. The bins container in 100% recycled plastic, a durable choice.

Sustainability & Material

Frame in powder coated steel plate made in Sweden and consists of 20% recycled materials. The steel plate is 100% recyclable. The powder coating is a good environmental choice as no solvents are used. Container bin in 100% recycled plastic. The container bin is dishwasher safe.

Ridge Recycling

Ridge, with its special expression, becomes a different and expressive feature in the modern office. It gives the impression of an interior detail, not just a recycling station. What distinguishes Low and High is the slope of the upper frame.

A very stable construction that is built of 22 mm MDF and lacquered in 11 standard colours. The stainless steel ramp for easy access of a 140 litres waste bin is not only a practical detail, but also a part of the design that stands out. Ridge can be ordered with different recycling symbols depending on the purpose and waste.

- Integrated bag holder in stainless steel for sack is included in Ridge low/high Bag
- Door protection and loading ramp all in stainless steel
- Rubber mat included
- Adjustable feet
- Doors with aximate hinges, 135°

Tested in accordance with SS-EN 16121:2013 and A1:2018.

Clean

Dispenser stand

Clean – a flexible hand sanitiser dispenser stand.

Having good hand hygiene is important to protect both yourself and others from reducing the spread of infection and virus. Sanitising your hands is something that most people do when visiting shops, restaurants, offices or other public places.

When TreCe realised that the spread of infection became a problem in society, we began to think about how we could contribute, and came up with our own solution. A hand sanitiser floor stand, which is based on the customer's needs. Flexibility and simplicity are important to many and we have chosen to focus on that. The foundation is a stand with a stable base, with accessories you need and believe are of importance to your customers. Two different models of bottle holders (750 ml and 1000 ml) with leaking tray, holders for Tork M1 dispenser, a small bin and a sign for your own message (horizontal A4).

The stand consists of perforated holes on the front and back, where you simply hook on the accessories you have chosen in the place you want. In a preschool, you may choose to place the accessories at a lower height than in a high school, for example.

Sustainability and material

Clean is made of Swedish quality steel and powder coated in Anthracite grey colour RAL 7016. The stand and other parts in powder-coated steel sheet are manufactured in Sweden and consist of 20% recycled material. The steel sheet is 100% recyclable. The powder coating of the frame is a good environmental choice as no solvents are required. Inner container in 100% recycled plastic and is dishwasher safe.

This is how you order Clean:

1. Choose stand
2. Add accessories – dispenser holders
3. Add accessories – sign holder
4. Add other accessories such as holder for Tork M1, Clean Hold mini waste bin.

Place Shelf

Place is available in two shelf widths (361 and 739 mm, excluding end gables) and three different heights (1003, 1433 and 1863 mm) that can be easily assembled and adapted as needed.

As a step in TreCe's continuous environmental work, Place is delivered in flat packages and can be mounted easily on site.

The gables are pre-assembled and the shelves mounted with cam lock screws from above.

The decor shelf, which is put in place after the supporting shelf is mounted, conceals the fittings and gives a neat finish.

Anthracite RAL 7016

Archive

Steel/Pine

Robust archive for efficient storage of large volumes. Compact, robust and easy-working. Gables and shelves in steel can handle high loads, 50–120 kg per shelf at widened load. If necessary, the archive can be customised for even greater weight. Choose between steering wheel, power steering or handle.

Compact Archive with steering lock and back panels for added security.

Steering wheel-driven compact archive with pull-out filing for different folder sizes.

A flexible compact archive in lacquered steel sheet that can be customised to the different formats archived, ex A4 or standing A4.

The height, width or length can be adjusted and designed as needed.

Complete archive for efficient storage of large volumes. Compact, robust and easy to work.

Gables and shelves in lacquered solid pine.

Archives withstand very high loads – 100 kg per shelf. If necessary, the archive can be adapted to hold greater loads.

Choose between the wheel operation or handles.

Worktops

High pressure laminate, 23 mm standard work tops coated with high pressure laminate and 2 mm airtec-lipping*. MFC laminate 22 mm standard worktops have an outer paper layer coated with an impregnated paper and a finish of aluminium particles for extra protection against wear. 2 mm matching airtec-lipping.

Airtec-lipping, also known as laser edging, provides an almost invisible joint between the worktop and edging strip. Thus provides a higher protection against water and heat. This new technology is glue-free, which results in a lower environmental impact.

Rounded corners	Min. radius 100	820010	553

High pressure laminate: 23 mm standard work-tops with high pressure laminate and 2 mm matching airtec-lipping.

- Formica Collection Colours
- Formica Collection Woods

MFC laminate: 22 mm standard worktops have an outer paper layer coated with an impregnated paper and a finish of Aluminium particles for extra protection against wear. 2 mm matching airtec lipping.

Veneer: 22 mm clear lacquered beech, birch or oak veneered chip-board with 2 mm solid lipping.

Airtec lipping: Airtec lipping, also known as laser edging, provides an almost invisible joint between the worktop and edging strip. Thus provides a higher protection against water and heat. This new technology is glue-free, which results in a lower environmental impact.

Inserts: Powder coated steel insert, available in white or black.

- Round with diameter 110, 250 or 400 mm.
- Square 250x250 mm or 350x350 mm.
- Slim 340x40 mm.

Lid for insert: Powder coated steel. Available for round inserts with diameters 250 and 400 mm.

Inserts: Stainless steel, integrated ring in worktop

- Round 250 mm in diameter.

Lid for insert: Compact laminate, folded in / integrated into ring, thickness 6 mm

- Round 250 mm in diameter with knob.
- Compact laminate, Formica F2297 (anthracite) alt. F1040 (white).

Inserts and lids, see page 128.

Contact TreCe if you want worktops in other high-pressure materials or other materials such as Valchromat.

Dimensions: Width x Height x Depth.

NCS refers to product lacquered in any optional NCS colour.

Specifications

Space

Space

MFC laminated surfaces within Space have a chip core, with the exception of some shelves. Back, frame and edging strip have matching colours unless otherwise stated. Fronts, Shoe shelf, Open shelf/Bench and Storage box open/Flower box have an MDF core. Textiles at an additional cost.

Frame incl. plinth

Thickness 16 mm, 0.8 mm straight ABS-lipping.

- MFC laminate, white.
- Lacquered, any NCS-colour.
- Double module, width 790 mm
- Single module, width 395 mm

Back

Thickness 16 mm, MFC laminate in- and out. Lacquered when choosing any NCS-colour.

Plinth

Each unit has its own setback plinth, front and rear, with 4 adjustable feet, (Plinth height 143 mm.)

Leg stand

Leg stand in steel with adjustable feet, 4 legs. Delivered not fitted to cabinet, leg stand must be adjusted in height before cabinet is lifted on.

- Leg stand double fits Space double.
- Leg stand triple fits 1x Space double + 1x Space single.
- Leg stand height 143 mm.
- Available in 11 RAL colours.

Fronts

Seamless fronts, thickness 16 mm

- Seamless fronts, thickness 16 mm
- Lacquered MDF, any NCS colour

Inside dimensions:

Space door low: W363 x H424 x D454 mm.

Space door middle: W363 x H573 x D454mm.

Space door high: W363 x H864 x D454 mm.

Drawers

Drawers have soft closing. Extension capacity of 100%, maximum weight 35 kg.

- Drawers with railings or with elevated sides.

Doors to Space recycling units and Space counter

- With push open

Seat module with hatch door

Opens downwards with gas spring.

- Milled-in handle

Accessories: Cushion

Shoe shelf, Open shelf/Bench and Storage box open/Flower box

Thickness 16 mm.

- Lacquered MDF, any NCS colour.
- Modules aligned with fronts.
- Plant pot can be combined with plastic box 19L.
- Modules aligned with fronts.
- Plant pot can be combined with plastic box 19L.

Double doors Wardrobes

With milled-in handles.

Mail inlet

Powder-coated steel, White (RAL 9010). Opening 290x20 mm. Mail inlet has an angled steel lip on the inside of the door.

Hinges

- Self closing concealed hinges with integrated soft closing.
- Doors are right-hung as standard.

Shelves, fixed

Shelves mounted with milled-in connection fittings that are secured with screws.

- Shelves for lockers have a chip core
- Shelves for wardrobes have a lamellar wood core.

Shelves, movable

Shelves are shortened in the front. Mounted with connection fittings, adjustable by drill division of c/c 32 mm.

Cover panels/Top cover panels

Thickness 16 mm.

- Lacquered MDF, any NCS colour.

Top cover in compact laminate Thickness 12 mm

- F2255, white
- F2297 anthracite
- F5343 olive grey

Inlets for top cover, compact laminate

- Inlets square B220 x D220 mm
- Inlet custom, max. size B220 x D260 mm

Top cover, socket strip:

Thickness 28 mm

- Lacquered MDF, any NCS colour.

Accessories

Clothes rail, carpet, clothes hook, anchor hook, mirror and cork box Stuff.

Lock types

Different types of locks and fittings are available for doors, such as electronic RFID locks, code locks, cabinet locks, padlock fittings and push-to-open. For network-based locks contact TreCe for individual advice.

General info

Mounting

All modules are factory mounted. Worktops/ Cover panels/Top cover panels are mounted on site.

Warranty

We provide a 5 year factory warranty on Space. Other products, contact TreCe.

Cabinet locks

Robust cabinet locks with master key system, individual numbers with 2 keys as standard. Identical locks available to addition.

Contact TreCe for customisation of selected product.

Specifications

CombiLine

CombiLine

MFC laminated and lacquered surfaces within CombiLine have a chip core, with the exception of some shelves. Back, frame, doors and edge strips have the same colour/wood as other parts as standard, unless otherwise stated.

Frame

Thickness 19 mm, 0.8 mm straight ABS-lipping.

- MFC laminate white, beech, birch and oak.
- Lacquered available in any NCS-colour.

Back

Thickness 12 mm, laminate inside and outside.

Plinth

Every module has its own front and back plinth with 4 adjustable feet (does not apply to recycling units with loading ramps). Plinth 157 mm. Can be replaced with;

- Bottom plate with adjustable stainless steel legs, height 157 mm.
- Bottom plate with lockable wheels, height 104 mm.

Doors

Thickness 16 mm, 2 mm straight ABS-lipping.

- White lacquered UV-treated MFC laminate (NCS S 0500-N), or MFC laminate in beech/ birch/oak.
- Lacquered in any NCS colour.
- Self closing concealed hinges with integrated soft closing (does not apply to products with aximat hinges with 180° opening).
- Single doors are right-hung as standard.

Drawer fronts

Drawer front, low: 173 mm
Drawer front, high: 349 mm
Thickness 16 mm, 2 mm straight ABS-lipping.

- White lacquered UV treated MFC laminate (NCS 0500-N) and MFC laminate in beech/ birch/ oak.
- Lacquered available in any NCS-colour.

Drawers

Drawers with depth 570 mm have soft closing.

- Extension 70%, max 30 kg.
- Extension 100%, max 35 kg (excl. recycling units).
- Extension 100%, max 65 kg.

Shelves

All shelves are adjustable and mounted with milled-in shelf support. Drill division c/c 32 mm.

- 310 – 605 mm have a chip core.
- 800 – 900 mm have a pine lamellar core.

Recycling unit

MDL60/MD60/MDH60/MD65/MD70

The bottom plate is equipped with an access ramp in stainless steel.

- Doors with aximat hinges for 180 degree opening for easy access to recycling containers.

Mail shelves

Adjustable with pull-out function and mounting strip, subdivision c/c 96 mm.

- Mail shelves in acrylic have integrated name slots.
- Mail shelves in powder coated steel white or black are available as an addition.

Steel doors mail sorting

White powder coated steel. Shelves inside in the same material as frame, 19 mm.

- Including lock and 2 keys with individual lock number.
- Inlet 22 mm. Open door gives a free space of 90 mm.

Wall modules

White lacquered mounting strip in steel is included for all wall modules.

Lock types

Cabinets locks, padlock fittings, code locks and RFID-locks (EM & Mifare). For network-based locks contact TreCe for individual advice.

Fitting pieces/Cover panels

Available as accessories in the same colour/ material as frame. Width, height and depth adapted to your requirements.

Handles

Stainless steel bow handles as standard, if you would like black or white handles, please not on order.

- Standard handles c/c 128 mm.
- Grip handles 40 mm.

Work tops

High pressure laminate: 23 mm standard work-tops with high pressure laminate and 2 mm matching airtec-lipping.

- Formica Collection Colours
- Formica Collection Woods

MFC laminate: 22 mm standard worktops have an outer paper layer coated with an impregnated paper and a finish of Aluminium particles for extra protection against wear. 2 mm matching airtec-lipping.

Veneer: 22 mm clear lacquered beech, birch or oak veneered chipboard with 2 mm solid lipping.

Airtech-lipping: Airtec-lipping, also known as laser edging, provides an almost invisible joint between the worktop and edging strip. Thus provides a higher protection against water and heat. This new technology is glue-free, which results in a lower environmental impact.

Inserts: Powder-coated steel insert, available in white or black.

- Round with diameter 110, 250 or 400 mm.
- Square 250x250 mm or 350x350 mm.
- Slim 340x40 mm.

Lid for insert: Powder-coated steel. Available for round inserts with diameters 250 and 400 mm.

Inserts: Stainless steel, integrated ring in worktop

- Round 250 mm in diameter.

Lid for insert: Compact laminate, folded in / integrated into ring, thickness 6 mm

- Round 250 mm in diameter with knob.
- Compact laminate, Formica F2297 (anthracite) alt. F1040 (white).

General info

Warranty

We provide a 5 year factory warranty on CombiLine. Other products, contact TreCe.

Cabinet locks

Robust cabinet locks with master key system, individual numbers with 2 keys as standard. Identical locks available to addition.

Contact TreCe for customisation of selected product.

TreCe's sustainability work

Join us in the movement towards a sustainable future and a circular society to become part of a world in balance. We want to develop products with eco-respect, responsible supply chains and circular life.

Sustainability scoring system

In order to keep track of progress, we've developed a product rating system based on the scale of bronze, silver and gold. The system measures eco-respect and climate impact, circularity and quality, as well as social responsibility among our suppliers.

Quite simply, it serves as our working tool to develop the next generation of storage and sorting. For our customers, the rating system will help them choose products; we want to make it easy to choose sustainably.

The assessment system will be launched in 2022, so stay tuned. Until then, we continue our work behind the scenes investing in future materials, finding new ways to make use of materials, extending the use of products, and increasing awareness and transparency in our supply chain.

We have started an exciting journey filled with possibilities.

Why choose TreCe?

From idea to reuse, in decision and action, this is where we create new conditions and opportunities for sustainable development and circularity. We want to make it easy for our customers to make sustainable choices, and together we can achieve the vision of a sustainable future. Join us in our circular transition

Here are some reasons to choose us:

- 174 unique products approved by Möbelfakta
- We are certified according to ISO 14001 and 9001
- We support the UN's Global Sustainability Goals 2030
- We have the sustainability information in our product sheets
- We have sustainability goals and policies
- We use recycled materials
- We keep track of our suppliers in the supply chain
- We require the supply chain to operate in accordance with our Code of Conduct
- We offer circular solutions
- Production in Sweden
- We aim to continuously reduce our ecological footprint

We support the Sustainable Development Goals

We want and will actively contribute to achieving the Global Goals for 2030 and to limiting global warming to well below two degrees by 2050. We have selected 5 goals that reflect our activities and where we have the best opportunity to influence, these goals we will have as a starting point in our future work over the next 10 years.

Approved Möbelfakta products

An approved product gives us and our customers security and reassurance that the product meets the requirements for the environment, quality and social responsibility. Möbelfakta is a complete reference and labelling system for furniture owned by IVL Swedish Environmental Institute and Trä- och Möbelföretagen, TMF. Möbelfakta serves as a tool for sustainable choices and is for producers, purchasers, designers, architects, and others who use or work with furniture.

TreCe is certified according to

ISO 9001: 2015 and ISO 14001: 2015

ISO 14001 is an environmental management system that aims to improve and rationalise environmental work. Through environmental impact assessment, environmental goals and routines, an active environmental work is created, which in turn reduces our ecological footprint.

ISO 9001 shows that we work both internally and externally with continuous improvements, routines and monitoring that ensures the quality of our products and services. In short, that our customers and partners always get the best possible reception and service.
